 Environmental
 Quality

Do you need to dispose of old pesticides?

- Take advantage of this opportunity to **safely and anonymously** dispose of old and unusable pesticides.
- This collection event is for **agriculture waste pesticides** in Malheur County.
- **You must pre-register** with the disposal service so they are prepared to receive your chemicals. To get an application, contact Clean Harbors or Malheur County Extension. Complete and send application by mail, fax or e-mail to Clean Harbors Environmental. Please be registered by October 9. The Malheur County Extension office is happy to help you fax your registration forms into Clean Harbors.

To Download Registration Forms:

<http://extension.oregonstate.edu/malheur>
or call Clean Harbors Environmental Services 503-953-6397

Submit registration forms or questions to:

Graham Gadzia: Clean Harbors Environmental Services
Email: gadzia.graham@cleanharbors.com
Fax: 253-639-4249
Mail: 26328 79th Ave S
Kent, WA 98032

For Questions and Technical Assistance Contact:

Bill Buhrig at OSU Extension will provide confidential answers to questions or will assess whether degraded chemical stores can be safely transported.

Call: 541-881-1417 **Email:** william.buhrig@oregonstate.edu

To Check the Status of a Pesticide:

Oregon Department of Agriculture
Call: 503-986-4635 **Email:** pestreg@oda.state.or.us

Do you have empty pesticide containers to recycle?

- **You can recycle** clean, dirt and residue free, triple-rinsed plastic containers. For triple rinse procedures, see the Ag Container Recycling Council (ACRC) website at <http://www.acrecycle.org> and select the link for Container Rinsing.
- **All size containers up to 55-gallon** capacity plastic drums can be accepted. Containers need to be made from high density polyethylene (HDPE) and embossed with recycling symbol #2.
- **No pre-registration is needed** for dropping off empty, triple-rinsed pesticide containers. There is no charge for this service. There is no limit to the number of empty containers which may be turned in.

This is an opportunity for growers to clean their storages of unwanted materials. Old and unused pesticides can enter waterways through leaching, flooding, or runoff if spilled or if their containers fail. Chemicals collected from this area and disposed of are removed as threats to water quality.

Help protect our water, air and soil by bringing your old and unused pesticides to this collection event for proper disposal! You are also protecting your kids, grandkids, and pets!

Thank you for being good stewards!
