WHAT IS AN ALLOCATION ?

- ▶ **Seed Allocations:** We compile a list of requests for each variety and allocate in the spring and fall. If we have enough seed everyone gets what they have requested. If requests exceed what is available then a third party determines how the available seed will be divided up between those that have that have made requests. Requests that were received a year in advance have priority. This just means that we can't guarantee that you will get 100% of the seed you requested and in some cases you may not be allocated any seed.
