Miller Research Potato Pest Management Field Day

Thursday, August 19 from 10:00 am to 12:00 pm

Miller Research will be holding its annual potato pest management field day on Thursday, August 19. The event is open to the public and there is no cost to attend **<u>but please RSVP so we</u>** <u>**can plan appropriately for the event**</u>. This can be done on our website or by responding to jeff@millerresearch.com or (208) 431-4420.

The field day will begin at the field located at 225 N 350 E in Rupert (42.65517 N, -113.59940 E). Parking may be tight so please carpool as much as possible.

Agenda:

0	
10:00-10:45	Fungicide programs for the control of foliar disease (early blight, brown spot,
	white mold, and black dot) and fungicide resistance management
10:45-11:05	Fungicides for Rhizoctonia management
11:05-11:20	New research on powdery scab and potato mop-top virus
11:20-11:45	Seed treatments for Fusarium dry rot management
11:45-12:00	Effect of irrigation on the performance of pink rot fungicide treatments

Lunch will be provided back at the Miller Research office located at 422 E 200 N at the conclusion of the meeting.

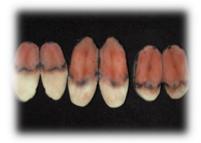

The presentations will focus on chemical management of diseases and will highlight research which has been funded by the Pacific Northwest Potato Research Consortium. ISDA pesticide recertification credits (2) and CCA Pest Management credits (2) have been awarded for this meeting.

Rhizoctonia on potato roots

Fusarium dry rot

Pink rot

Powdery scab root galls

Early blight

Potato mop top virus
