

Miller Research Potato Pest Management Field Day

Wednesday, August 23, 2023 from 10:00 am to 12:15 pm

Miller Research will be holding its annual potato pest management field day on Wednesday, August 23. The event is open to the public and there is no cost to attend **but please RSVP so we can plan appropriately for the event.** This can be done on our website or by responding to cheryn@millerresearch.com or (208) 312-4650.

The field day will begin at Miller Research: 422 E 200 N, Rupert (42.649075 N, -113.585594 E).

Agenda:

10:00-10:30	In-shop presentation: Principles of fungicide resistance management Use of metconazole (Quash) for disease control and yield improvement
	Plot tours:
10:30-10:45	Using variety resistance to reduce foliar fungicide use
10:45-11:00	Fungicides for Rhizoctonia management
11:00-11:30	Fungicide programs for the control of foliar disease (early blight, brown spot, white mold, and black dot) and fungicide resistance management
11:30-11:45	Managing aerial vine rot caused by bacteria
11:45-12:00	Use of metconazole (Quash) for disease control and yield
12:00-12:15	Disease diagnosis in the field

Lunch will be provided by Let's Go Dutch at the conclusion of the meeting.

The presentations will focus on chemical management of diseases and will highlight research which has been funded by the Pacific Northwest Potato Research Consortium. ISDA pesticide recertification credits (2) and CCA Pest Management credits (2) have been requested for this meeting.

Rhizoctonia on potato roots

Aerial Vine Rot
