

**Miller Research Potato Pest Management Field Day**  
Wednesday, August 20, 2025 from 10:00 am to 12:00 pm

Miller Research will be holding its annual potato pest management field day on Wednesday, August 20. The cost to attend is \$20 and payment can be made online through PayPal or at the event. Contact Cheryn Suarez at [cheryn@millerresearch.com](mailto:cheryn@millerresearch.com) or (208) 312-4650 if you have questions.

The field day will begin at the Miller Research field research at our main office at 422 E 200 N, Rupert (42.648994 N, -113.585612 E).

The presentations will focus on chemical management of diseases and will highlight research that has been funded by the Pacific Northwest Potato Research Consortium. ISDA pesticide recertification credits and CCA Pest Management credits will be requested for this meeting.

Topics will include:

- Alternatives to metam fumigation for Verticillium wilt control
- Managing black dot on the foliage and tubers
- Fungicide programs for foliar disease management
- In-furrow fungicides and seed treatments for Rhizoctonia management
- Use of PCC lime for disease control
- Variety susceptibility to powdery scab and PMTV
- Soil health in potatoes (Year 7 of an ongoing study)

Lunch will be provided at the conclusion of the meeting.

Rhizoctonia on potato roots

Verticillium wilt

Early blight
