

Pomology Program Annual Fruit Field Day

The University of Idaho Annual Fruit Field Day will be held on **Tuesday, September 20, 2011 8:30 am to 1:00 pm** at the **U of I Parma Research and Extension Center Pomology Orchard and Vineyard site, about 4 miles north of Parma, Idaho**. The registration will start at 8:30 am and program will start at 9:00 am (sharp). Several cultivars of new table grapes, peaches, nectarines, apples, quince, Asian pears, and other alternative fruits will be presented during the tour. Participants can taste many of these fruits. Highlights of this event will be:

- 1) The field day will start at the **U of I Pomology Orchard Site** with discussion on fruit research and production, visiting several fruit-industry commercial booths, and the opportunity to taste several types and cultivars of fruits.
- 2) Tour of the U of I comprehensive research projects on 'Fuji' apple irrigation, fruit nutrition, chemical thinning, and pesticides uses.
- 3) Tour of the modern super high density orchard with different canopy architectures and rootstocks.
- 4) Mechanization for spraying, harvest, thinning, stress evaluation, and tree/vine training to reduce labor.
- 5) Tour of the stone fruit selection research orchard.
- 6) Tour of the alternative fruit crops, including quince, Asian pears, persimmons, Jujube, Haskaps, etc.
- 7) Tour of the national apple rootstock selection research.
- 8) Tour of the peach and pluot research.
- 9) Tour of the table grape vineyards, new grape canopy research.

Note: All tours include discussion/questions/answers on various cultural practices of fruit crops, including planting, growth regulators, pruning, thinning, girdling, irrigation, pest and disease control, safety in chemical application.
