

Miller Research Pest Management Field Day
Wednesday, August 15 from 9:30 am to 12:00 pm
426 East 200 North; Rupert, ID

For all potato growers, consultants, and any others interested in potato pest management and white mold management in dry beans:

Miller Research will be holding a pest management field day on Wednesday, August 15 at the Miller Research facility located near Acequia, ID (426 E 200 N). A short presentation will be given in the office followed by a tour of the research plots.

The presentations will focus on cultural and chemical management of diseases. We will discuss strengths and weaknesses of different management approaches

Agenda:

- 9:30-10:00 Overview of research projects on early blight/brown leaf spot/black dot, white mold, Rhizoctonia, and potato psyllid control.
- 10:00-10:30 Rhizoctonia control trial, white mold control.
- 10:30-11:00 Early blight/black dot trials; discussion on leaf spots and pathogens.
- 11:00-11:30 Update on the potato psyllid and Zebra Chip situation in Idaho.
- 11:30-12:00 White mold control in dry beans.

If there is interest, we will offer the same program in the afternoon from 1:00 to 3:30 for any who cannot attend in the morning.

Please RSVP to Jeff Miller at 208-531-5124 or by email at: jeff@millerresearch.com so that we can get an accurate count for room preparation purposes.

The research highlighted in this field day has been sponsored in part by the Idaho Potato Commission and the Idaho Bean Commission.
