System**

**Wireless Monitoring for Moisture Levels and
Filter Stations**

Aqua-Traxx®

with the PBX Advantage

ADVANTAGE

1

MORE UNIFORM OUTPUT FOR ANY TERRAIN

STANDARD TAPE

Standard tapes stress plants and reduce yield and efficiency by over- or under-watering as pressure changes throughout the run.

RESULT: Wasted water and fertilizer, stressed plants and reduced yields.

AQUA-TRAXX® FC

Toro Aqua-Traxx FC gives you uniform output regardless of elevation changes. So now you can adjust the amount of water you give your plants on hilly terrain, and they'll all receive the same amount through our uniform delivery system.

RESULT: More uniform plants and higher yields even in hilly terrain that might otherwise be impractical to farm.

Aqua-Traxx®

with the PBX Advantage

ADVANTAGE

2

THE ABILITY TO CONTROL THE FLOW

AQUA-TRAXX® FC

Toro Aqua-Traxx FC puts you in control of watering decisions. You control how much water your plants receive by increasing or decreasing the operating pressure — without sacrificing uniformity.

RESULT: More uniform delivery of water and fertilizer to the roots of your plants with the flexibility to control application rates.
