Welcome to the National Alfalfa & Forage Alliance

Mission and Objective

NAFA's mission is to ensure the ability of all segments of the alfalfa and forage industry to compete effectively and profitably, domestically and abroad.

The objective of NAFA is to be a forum for consensus building among the various stakeholders and to be an effective advocate on behalf of the alfalfa and forage industry.

NAFA - Year in Review

National Alfalfa & Forage Alliance 2013-2014 Annual Report

Moran Earns NAFA's Top Honor

For his efforts in securing valuable research funding for the Alfalfa Forage Research Program (AFRP) and in bringing recognition to the need for an improved alfalfa insurance program, as well as for his dedication to the nation's alfalfa and alfalfa forage systems producers, Senator Jerry Moran (R-KS) was awarded NAFA's inaugural Outstanding Service Award which recognizes and rewards significant contributions to the industry.

Senator Moran was presented with the award during his visit as the featured guest at NAFA's D.C. Fly-In during which he discussed the importance of alfalfa to the nation's beef and dairy producers and his continued commitment to AFRP research funding.

NAFA Holds 4th Annual D.C. Fly-In

For the fourth year in a row, NAFA members traveled to Washington, D.C., to meet with lawmakers to discuss issues related to alfalfa and alfalfa forage systems. NAFA met with staff of House and Senate Ag Committee members, House and Senate Ag Appropriations Committee members; EPA; the U.S. Trade Representative for Ag Affairs; USDA's Risk Management Agency; National Ag Statistics Service; Research, Education, & Economics Office; and Agricultural Research Service.

Senator Jerry Moran (R-KS)

In total, NAFA representatives attended more than 100 meetings scheduled over the course of the 4-day event to promote NAFA objectives, educate Congressional members on the issues important to the alfalfa industry, and continue to build awareness and recognition of the nation's 3rd most valuable crop.

In meetings with staff of House and Senate Ag Committee members, NAFA members focused on the lack of an adequate safety net for alfalfa producers and the need for a crop insurance program which gives producers the option of insuring themselves against

Senator Patty Murray (D-WA) with NAFA Director Mark Wagoner.

losses in revenue and/or quality. In both the Senate and House versions of the Farm Bill, program crops continue to maintain protection under the newly created "shallow loss" programs (Agriculture Risk Coverage in the Senate version and Price Loss Coverage and Revenue Loss Coverage in the House version). However, none of these programs cover alfalfa, making the need for adequate crop insurance products more critical.

NAFA members also met with staff of both the House and Senate Ag Appropriations Committees addressing the need for parity with other major crops through public research conducted by both the Agricultural Research Service (ARS) and land grant universities through the National Institute of Food & Agriculture (NIFA).

In addition to Congressional meetings, NAFA met with: 1) Environmental Protection Agency to maintain communication about crop protection tools for the alfalfa seed industry; 2) the U.S. Trade Representative for Ag Affairs regarding low level presence tolerance issues and asynchronous regulatory approval of new traits in key export markets; 3) USDA's Risk Management Agency to discuss the creation of new and/or improved crop insurance options for alfalfa producers; 4) USDA's National Ag Statistics Service to talk about how to improve alfalfa yield statistics; 5) USDA's Research, Education, & Economics Office and Agricultural

Research Service to discuss how best to use limited alfalfa research funding to keep alfalfa competitive with other cropping choices.

The 4th annual "Alfalfa on the Hill: Bluegrass Style" reception was a highlight of the event as Congressional members and their staff joined NAFA members to visit informally about industry issues. The reception featured an alfalfa-intensive 'grazing' menu including lamb chops, mini cheeseburgers, beef nega maki, assorted cheeses, vegetables with alfalfa sprout dip, and ice cream bars.

NAFA Summer Board Meeting Held in Boise, ID

The National Alfalfa & Forage Alliance board of directors met in downtown Boise, ID, for its annual summer board meeting. In conjunction with the June 25-26 meeting, board members were also treated to a guided tour of one of its member facilities - Summit Seed Coatings.

Special guest Tom Bewick, National Program Leader of the Division of Plant Systems Production at USDA's National Institute of Food and Agriculture (NIFA), joined the NAFA board to discuss the implementation of the newly funded Alfalfa Forage Research Program (AFRP). Bewick is responsible for the program's administration.

NAFA meeting sponsors included Alforex Seeds; DuPont Pioneer; Forage Genetics International; Monsanto; and Summit Seed Coatings. J.R. Simplot generously offered the use of its facilities and served as host for NAFA's 2014 summer board meeting.

Winter Survival, Fall Dormancy & Pest Resistance Ratings for Alfalfa Varieties

Information is obtained from the Association of Official Seed Certifying Agencies (AOSCA) and the National Alfalfa Variety Review Board (NAVRB) report. Blank spaces indicate the variety has no approved rating through AOSCA.

Fall Dormancy (FD) Rating Descriptions

FD Rating	Description
1, 2	Very Dormant
3, 4	Dormant
5	Moderately Dormant
6, 7	Semi-Dormant
8, 9	Non-Dormant
10, 11	Very Non-Dormant

FD is the degree of fall alfalfa growth, as a response to temperature and day length. Lower dormancy ratings exhibit less fall growth, while higher dormancy ratings indicate greater fall growth. FD ratings are indicesexes assigned by comparing the height of fall growth with standard check varieties, and tested across locations and years to accurately represent dormancy response across environments.

Resistance Ratings						
% Resistant Plants	Resistance Class	Class Abbreviation				
0-5%	Susceptible	S				
6-14%	Low Resistance	LR				
15-30%	Moderate Resistance	MR				
31-50%	Resistance	R				
>50%	High Resistance	HR

Roundup Ready Alfalfa **NAFA's Statement on** Roundup Ready

Grower Opportunity Zone

GROWER OPPORTUNITY ZONES NON-GE SEED PRODUCTION AREAS

AP-SENSITIVE GOZ. This is a zone for seed production of APS alfalfa seed and conventional alfalfa seed. As outlined in NAFA Best Management Practices for Roundup Ready Seed Production, RRA seed production would not be allowed in an APS GOZ

The following APS GOZs have been grower requested/approved - click to link to the GOZ map identifying GOZ boundaries for each:

Parts of Canvon & Owyhee Counties, ID and Malheur County, OR (January, 2012). Part of Park County, WY (January, 2012)

GE GOZ. This is a zone for seed production of GE and conventional alfalfa seed that is destined for markets that are not APS. APS alfalfa seed production would not be practical in a GE GOZ. As outlined in NAFA Best Management Practices for Roundup Ready Seed Production, Association of Official Seed Certifying Agencies (AOSCA) certified seed production isolation requirements apply between GE and conventional seed within a GE GOZ. NAFA Best Management Practices for Roundup Ready Seed Production isolation requirements apply between a GE seed production field in a GE GOZ and the nearest conventional seed production field outside the GOZ border.

The following GE GOZs have been grower requested/approved - click to link to the GOZ map identifying GOZ boundaries for each:

Part of Canyon County, ID (July, 2011)

Parts of Walla Walla County, WA & Umatilia County, OR (July, 2011)

Orovada Valley, NV (August, 2011)

Lovelock Valley, NV (August, 2011)

Box Elder and Cache Counties, UT (August, 2011)

Jerome and Minidoka Counties and part of Twin Falls County, ID (August, 2011).

Oneida and Franklin Counties, ID (August, 2011)

Big Horn County, MT (August, 2011)

Washakie County, WY (August, 2011)

Part of Malheur County, OR (September, 2011)

Fremont County, WY (September, 2011)

Heart Mountain Area, WY (December, 2011)

Carbon County, MT (January, 2012)

Mesa County, CO (September, 2012)

Part of Canyon County, ID (October, 2012)

Rosebud and Treasure Counties MT (April, 2014)

NON-GE SEED PRODUCTION AREAS

Imperial Valley, California. The Imperial Valley of California is a large and concentrated alfalfa seed production area. In light of the unique growing circumstances in Imperial County and the current international approval status of RRA, Monsanto has worked with the Imperial County Farm Bureau and established unique stewardship requirements for RRA in Imperial County, which are set forth in the Monsanto Technology Use Guide and Monsanto Technology Stewardship Agreement. All alfalfa seed production in Imperial County currently meets the isolation standards for ASSP, making this a very favorable production area for nondomant alfalfa seed destined for APS markets.

Biotechnology NAF D.C. Fly-In

Each February, National Alfalfa & Forage Alliance members travel to Washington, D.C. to participate in NAFA's annual D.C. Fly-In where they meet with lawmakers to discuss issues related to alfalfa and alfalfa forage systems. Typically, NAFA meets with staff of House and Senate Ag Committee members, House and Senate Ag Appropriations Committees members, USDA, and other agencies as necessary.

NAFA representatives may attend more than 100 meetings scheduled over the course of the 4-day event to promote NAFA objectives, educate Congressional members on the issues important to the alfalfa industry, and continue to build awareness and recognition of the nation's 3rd most value crop.

KS Senator Jerry Moran with NAFA Director Geremy Larson

NAFA member John Grover with WY Senator John Barrasso

MN - Congressman Tim Walz

NAFA Board

Tuesday, February 11 - Thursday, February 13, 2014

Alfalfa is key to sustainable agricultural systems and is an economic engine in rural communities - its value for soil conservation, nitrogen fixation, energy savings, crop rotation, and wildlife habitat is unsurpassed.

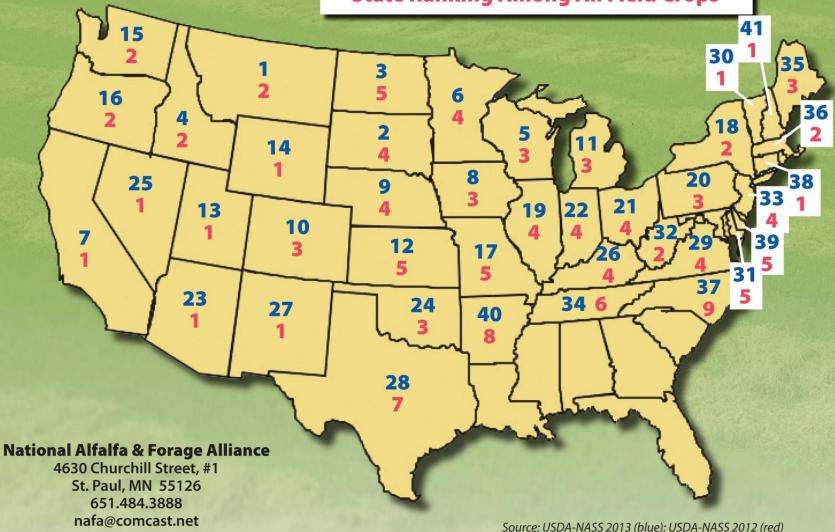

Alfalfa must offer a competitive value for farmers in order to provide these benefits and maintain or expand its acreage base. Being recognized in policy and research funding decisions is critical in keeping pace with other cropping choices.

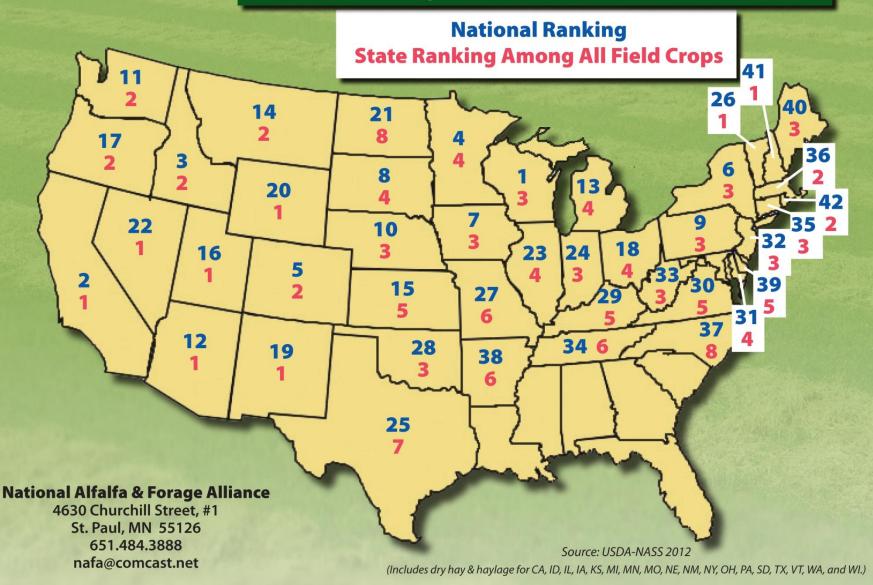

Alfalfa Production Acreage

Value of Alfalfa Production

\$13.5 billion in 2012

NAFA STRATEGIES & POLICY ISSUES

NAFA requests agencies use sound science in policy development and adhere to established comment procedures.

Alfalfa Safety Net

- > Forage Crop Insurance (enhance existing program; work with developers as they craft new revenue and quality policies)
- > Title 1 status

Public Research

> ARS

- Request continued support for U.S. Dairy Forage Research Center; hire new director
- Request continued support for St. Paul ARS Forage Unit (i.e., fill vacant positions)
- Request continued support for Logan ARS Units (Bee Lab & Forage Unit)
- Maintain support for Prosser position
- Establish two western positions to work in collaboration with the USDFRC

> NIFA

- Request reauthorization of Alfalfa and Forage Research Program in Farm Bill; seek funding
- Work with NIFA on land grant commitment to forages (i.e., fill vacant forage positions)
- Continue to work with NIFA on grant opportunities (similar to BRAG offering)

NASS Data

- Secure value reporting for green chop/haylage
- Improve accuracy of alfalfa yield reporting (i.e., survey questions)

Assist in Establishing LLP Tolerances in Key Export Markets

> When appropriate, work with ASTA, agencies and other national associations

Crop Protection Tools

- Continue to work with EPA to support and maintain seed industry crop protection tools (seed industry has non-food use status)
- > Continue to work with EPA to support and maintain forage crop protection tools

Miscellaneous

- > Maintain NRCS CSP language designating alfalfa as a "resource-conserving" crop
- ➤ Work with EPA on RFS2 certification
- Monitor the Endangered Species Act (ESA)

NAFA requests agencies use sound science in policy development and adhere to established comment procedures.

Alfalfa Safety Net

- Forage Crop Insurance (enhance existing program; work with developers as they craft new revenue and quality policies)
- → Title 1 status

McConnell Includes Alfalfa Crop Insurance Language in Farm Bill's Manager's Report

Senator Mitch McConnell (R-KY) showed his support for alfalfa by inserting language in the Manager's Report of the 2014 Farm Bill. The language inserted appeared as follows:

"The Managers recognize alfalfa to be an important domestic forage crop valued for nitrogen fixation, soil conservation, crop rotation, and as a natural habitat. The Managers view alfalfa as having great potential for the national cash hay market and as an affordable means of supporting the forage and intensive grazing needs of the horse, cattle, and dairy sectors. However, from 2002 through 2011, alfalfa acreage has declined 15.7 percent, and in 2012 alone acreage declined an additional 10 percent. The Managers stress the importance of an alfalfa crop insurance policy to ensure that producers have the risk management protection that they need to produce this important crop. The Managers urge the Secretary to include information regarding regional differences in cultivation in the alfalfa crop insurance study."

Beginning Stages of a New Safety Net

Forage Seed Insurance Pilot Program to Become Permanent Policy

Public Research

- > ARS
 - Request continued support for U.S. Dairy Forage Research Center; hire new director
 - Establish two western positions to work in collaboration with the USDFRC
 - Request continued support for St. Paul ARS Forage Unit (i.e., fill vacant positions)
 - Request continued support for Logan ARS Units (Bee Lab & Forage Unit) (i.e., fill vacant positions)
 - Work to restore seed grower funding from the Logan Bee Lab
 - Maintain support for Prosser position

Success! ARS Hires Boggess as New U.S. Dairy Forage Research Center Director

NAFA's highest priority in terms of ARS was the appointment of a new Director for the U.S. Dairy Forage Research Center. NAFA worked with ARS in prioritizing this need. In May Dr. Mark Boggess was selected as the new Director.

Success! USDA-ARS Allocates \$100,000 for Alfalfa Pollinator Health Initiative

Project Title	Principal Investigator	Award
Effects of Pest Management Practices on Pests and Alfalfa Leafcutting Bees in Alfalfa Seed	Jim Barbour Univ. of Idaho	\$15,406
Understanding the Effects of Nutrition and Juvenile Hormone on Reproductive Output in Alkali Bees	Karen Kapheim Utah State Univ.	\$22,454
Probiotic Prospecting for Alfalfa Leafcutting Bees	Quinn McFrederick Univ. of California	\$18,894
Lethal and Sublethal Effects of a Systematic Pesticide on Alfalfa Leafcutter Bees	T'ai Roulston Univ. of Virginia	\$23,802
Enhancing and Protecting Populations of Alkali Bee Nomia melanderi	Doug Walsh Washington State Univ.	\$19,444

 - Request reauthorization of Seek funding for Alfalfa and Forage Research Program in Farm Bill; seek funding
 - Work with NIFA on land grant commitment to forages (i.e., fill vacant forage positions)
 - Continue to work with NIFA on grant opportunities (similar to BRAG offering)

Success! \$1.35 Million in Research Funding

Thanks to the dedicated efforts of Senator Jerry Moran (R-KS).

The request for proposals for the AFRP was distributed in June and resulted in the collection of 23 proposals requesting more than \$3.7 million in funding.

AFRP Project Title	Principal Investigator	Award
The Effect of Hay Rake Type on Ash Content of Alfalfa Hay	Dan Undersander Univ. of Wisconsin	\$155,884
Developing an Alfalfa Hay Export Market in the Humid Eastern United States	Chris Teutsch Virginia Tech	\$156,140
Root Traits to Enhance Nutrient and Water Use in Alfalfa	Deborah Samac USDA-ARS	\$156,230
Subsurface Drip Irrigation, Deficit Irrigation Strategies, and Improved Varieties to Improve Alfalfa Water Use Efficiency Under Drought Conditions	Dan Putnam Univ. of California	\$156,254
Using a New In Vitro Method and Fiber Model (TTNDFD) to Improve Estimates of Digestibility of Alfalfa for Dairy Cattle	Dave Combs Univ. of Wisconsin	\$156,280
Nutritive Value and Forage Accumulation of Alfalfa and Alfalfa- Mixtures as Influenced by Forage Management	Renata La Guardia Nave Univ. of Tennessee	\$156,287
Yield Improvement and Fall Dormancy Characterization in Alfalfa	Charlie Brummer Univ. of California	\$156,287
Implementing Lygus Management Strategies in Alfalfa Seed Production	Doug Walsh Washington State Univ.	\$156,675

Emergency Forage Strategy

- NASS Data
 - Secure value reporting for green chop/haylage
 - Improve accuracy of alfalfa yield reporting (i.e., survey questions)

Assist in Establishing LLP Tolerances in Key Export Markets

→ When appropriate, work with ASTA, agencies and other national associations

Maintain and Enhance Key Export Markets

- When appropriate, work with ASTA, agencies, and other national associations to establish LLP tolerances
- Refine coexistence strategies, when appropriate, to meet requirements of key export markets

Crop Protection Tools

- Continue to work with EPA to support and maintain seed industry crop protection tools (seed industry has non-food use status)
- Continue to work with EPA to support and maintain forage crop protection tools

Miscellaneous

- Monitor the Endangered Species Act (ESA)
- ➤ Monitor RFS2 certification process

By collaborating together

We can achieve more!
